

TSF-10·10F·11·11F

Features

1. The TSF-10·10F·11·11F can discharge condensate effectively without retention, and realize energy saving steam system without steam loss.
2. Incorporated thermostatic air vent discharges air inside the piping and shortens warming-up time.
3. With turning the cock, it is possible to meet various flow direction such as horizontal or vertical installation. Flow direction can be switched easily without disassembly such as detaching the cover.
4. Since the main parts are installed on the cover and it is possible to disassemble the cover with the body installed on the piping, and inspection and parts replacement can be conducted easily.

Caution for Installation

Wrong posture hampers proper operation.

Fix the cock with spanner and loosen the nut. Turn the cock and adjust direction of the name plate to position "TOP" and "BOTTOM" signs on upside and downside respectively.
Fix the cock with spanner and fasten the nut after adjustment.
